

TAA for Workers Significantly Impacted County List

Last Updated: January 4, 2010

This list accompanies the Community Trade Adjustment Assistance (Community TAA) Program Federal Funding Opportunity (FFO). It was generated by the Economic Development Administration (EDA) to assist communities in assessing whether they are likely to be eligible under the Community TAA Program. Under the statute that created the program, EDA must make an Affirmative Determination that a community (defined as a city, county, or other political subdivision of a State or a consortium of political subdivisions of a State) is significantly impacted by trade before a community can receive grant assistance under the program. For counties on this list, EDA has reviewed job-loss information associated with certifications under the Department of Labor's Trade Adjustment Assistance for Workers program and determined that these counties have suffered a significant impact due to trade and have obtained an Affirmative Determination.

Please note that this list only addresses trade impact significance for counties and county equivalents. For a community that is not on this list, but is located within one of the geographies on the list, EDA must still make an Affirmative Determination that the community itself has been significantly affected by the threat to, or the loss of, jobs associated with certifications under one or more of the Trade Act programs. This list will help communities within certain counties identify that they may be eligible for grant assistance under the Community TAA Program based upon the significance of job loss associated with the certifications.

Data source and analysis: the following counties have been deemed to be significantly impacted by trade according to EDA's analysis of trade certifications made by the Department of Labor from January 1, 2007 through December 15, 2009. Counties deemed significantly affected have had at least 8.25 per 1000 workers affected by trade since 2007. To get more information about specific trade certifications in your area, please visit the Department of Labor's Trade Adjustment Assistance website at:
